Gold Rises Steadily amid Weak U.S. Economic Data and Trade Tensions

- Precious Metals:** After falling to a low of US\$1,200 per ounce ten days ago, the price of gold has risen steadily as recent U.S. economic data suggests capital spending may be slowing down due to the continued trade war between the U.S. and China. This week, Durable Good's Orders for October hit a 15-month low (down \$11.7 billion to \$248 billion), while recent manufacturing and housing reports also came in weaker. With this backdrop in disappointing economic data, the U.S. Dollar Index remains where it was one week ago, while the price of gold has risen 2% since mid November. Gold equity indexes for larger cap companies have followed this positive trend; both the S&P Global Gold Index and VanEck Vectors Junior Gold Miners ETF are up this week. Some of the better performing gold equities in our coverage universe included B2Gold (BTO-T, BUY rating, \$5.00 target; up 9.5%), Oceanagold (OGC-T, HOLD rating, \$4.20 target; up 7.7%) and Endeavour Mining (EDV-T, BUY rating, \$32.00 target, up 6.1%). However, it continues to be a tough period for the junior exploration sector, as reflected by the S&P/TSX Venture Index which fell just above 600 points as of Thursday close. Whilst the malaise in the junior sector continues, there were some positive performers in the space this week, headlined by Superior Gold (SGI-V, BUY rating, \$1.50 target) which registered a 18.4% gain this week, while Liberty Gold (LGD-T, BUY rating, \$1.00 target) and Marathon Gold (MOZ, BUY rating, \$1.80 target) were both up 8.3% and 2.9%, respectively. Finally, while we saw gold rise 1.2% this week, silver also gained ground (up 1.4%), while platinum and palladium saw little change since last Thursday.
- Base Metals:** Were all down week over week (WoW). LME nickel was the most negatively impacted metal down -3.4% to \$4.95/lb, followed by LME zinc and copper were down -0.5% and -0.2% WoW at \$1.21/lb and \$2.82/lb, respectively. The LMEX Index was up 93 bps WoW at 2,926.4 at Thursdays close. The S&P Composite Diversified Metals & Mining Industry Index closed Thursday at 4,985.88, which was down -3.88% WoW. Metals are all down YoY with copper, zinc and nickel down -10.5%, -18.2% and -8.2%, respectively. LME inventories were all down WoW with copper, zinc and nickel inventories were down -13.3%, -2.3% and -0.6% WoW, respectively. Excluding bonded warehouse inventories, we calculate the current days of consumption at 6.2 for copper and 4.3 for zinc. The US Dollar Index was down -22 bps this week, closing on Thursday at 96.7, having a slight positive impact on base metals prices. The majority of base metals equities in our coverage were down WoW. The most negatively impacted weekly performer in our coverage universe was Capstone Mining (CS:TSX, BUY, C\$0.70 target), down -4.8% WoW. The most positively impacted weekly performer in our coverage universe was Nevsun Resources Ltd. (NSU-T, TENDER, C\$6.00 target), which was up +1.2% WoW on Thursday.

Haywood Research: The Week in Review – Covered Companies

Publications from the Haywood Research team for the week included the following for covered companies:

- **Atlantic Gold Corp. (AGB-V, \$1.54):** Q3/18 financial results
- **Plateau Energy Metals Inc. (PLU-V, \$0.83):** Corporate update
- **Harte Gold Corp. (HRT-T, C\$0.395):** Q3/18 results
- **Nighthawk Gold Corp. (NHK-T; \$0.38):** Drilling results
- **Plateau Energy Metals Inc. (PLU-V, \$0.83):** Drilling results
- **Troilus Gold Corp. (TLG-V, C\$0.60):** Updated resource estimate
- **Marathon Gold Corp. (MOZ-T, \$0.70):** Drilling results

Covered Name Reports:

Atlantic Gold Corp. (AGB-V, \$1.54 [Hold Rating, \$1.80 Target Price]) – Q3/18 Financials Deliver a Lower Cost Quarter: In-line with Estimates

Geordie Mark, gmark@haywood.com; Alvin Islam, GIT, aislam@haywood.com

Overall operating costs and AISC contributed to low-cost quarter that was predominantly in-line with our estimates and resultant financials. Operations delivered 27,570 ounces via the processing of 581.1 kt of ore material grading 1.54 g/t gold with gold recoveries reported at 95.5%. A total of ~1,051 kt of ore material was mined in the quarter, at a strip ratio of 0.65:1 (w:o), which was below the year-to-date average of 0.75:1 (w:o) with 49% of the ytd mined ore (grading 0.52 g/t gold) now stockpiled for future processing.

See Haywood Securities for the full report

Plateau Energy Metals Inc. (PLU-V, \$0.83 [Buy Rating, \$3.00 Target Price]) – Corporate Update: Catalyst Rich Heading into 2019

Colin Healey, MBA, chealey@haywood.com; Aazan Habib, CFA, ahabib@haywood.com

Exploration and development work at Plateau's Falchani Lithium and Macusani Uranium projects is progressing in-line with our expectations. The Company has an exciting pipeline of catalysts that could drive share price outperformance in an environment of improving sentiment for lithium and uranium equities. Note that its recent \$5M equity financing is expected to fund exploration and development work at both projects for the rest of 2018 and H1/19.

See Haywood Securities for the full report

Harte Gold Corp. (HRT-T, C\$0.395 [Buy Rating, C\$0.80 Target Price]) – Commercial Production in Sight

Pierre Vaillancourt, pvaillancourt@haywood.com; Douglas Ibbitson, CFA, dibbitson@haywood.com

Harte Gold released 3Q18 results, expecting to reach commercial production at the Sugar Zone mine in December. Following the first gold pour in October, HRT expects to reach commercial mill throughput in December, defined as 75% of permitted capacity of 575tpd. Stope production underground has started, and the tailings management facility and the paste fill plant will be complete in 4Q18. We expect the mine to reach full permitted capacity of 575tpd in 1Q19, which would put the Sugar Zone mine on track for production of approximately 40koz Au in 2019. In 2019, the Company will apply to increase mill throughput to 800tpd, which could lead to annual gold production of 75koz in 2020.

See Haywood Securities for the full report

Nighthawk Gold Corp. (NHK-T; \$0.38 [Buy Rating, \$0.90 Target Price]) – New High-Grade Zones Discovered at Colomac

Mick Carew, mcarew@haywood.com; Emma Boggio, eboggio@haywood.com

The latest drilling results have successfully identified shallow (100 to 200 metres), higher-grade gold mineralization within previously untested areas along the Colomac trend. Grade is key at Colomac, given the CAPEX hurdle required to build a mine and processing facility in the northern Northwest Territories. We feel that today's results highlight the potential for higher-grade gold mineralization similar to Zone 1.5, although more drilling is required to determine width and continuity. Today's drilling results (19 holes in total) represent the last from Colomac for 2018, although investors can expect additional news flow from a maiden resource estimate for Damoti and results from metallurgical testwork and regional prospecting.

See Haywood Securities for the full report

Plateau Energy Metals Inc. (PLU-V, \$0.83 [Buy Rating, \$3.00 Target Price]) – Drilling from Falchani West Supports our Thesis of Large Resource Upside Potential

Colin Healey, MBA, chealey@haywood.com; Aazan Habib, CFA, ahabib@haywood.com

PLU has released new drill results from platforms 12-14 on the western side of the Falchani Lithium Project. Results include a very thick intersection from platform 14 of over 330 metres grading ~2,900 ppm Li (~277m true thickness), which is above the all-categories average resource grade to the east. Mineralization starts near surface at 7 metres depth in Hole PLAT 14-W and no uranium mineralization was present in the 7 metres of barren rhyolite overburden which supports the potential for an environmentally simple approach to permitting in this area.

See Haywood Securities for the full report

Troilus Gold Corp. (TLG-V, C\$0.60 [Buy Rating, C\$2.00 Target Price]) – New Resource, New Plan

Pierre Vaillancourt, pvaillancourt@haywood.com; Douglas Ibbitson, CFA, dibbitson@haywood.com

TLG released an updated resource for the Troilus Deposit. The resource has increased by 90% since 2016, with considerably more open pit ounces. The total open pit and underground resource is 5.1Moz, with 3.9M oz Indicated and 1.2Moz Inferred, at an overall AuEq grade of 1g/t. The focus is now on open pit resources, representing 62% of total resources, compared to 20% in 2016.

See Haywood Securities for the full report

Marathon Gold Corp. (MOZ-T, \$0.70 [Buy Rating, \$1.80 Target Price]) – Drilling Continues to De-Risk Marathon Deposit

Mick Carew, mcarew@haywood.com; Emma Boggio, eboggio@haywood.com

Marathon Gold announced infill drill results from its 100% owned Valentine Lake Gold Camp in central Newfoundland. Results demonstrate continued progress towards the Company's goal of converting Inferred resources to Indicated and Measured at Marathon and Sprite, as well as the further delineation of shallow, high-grade gold mineralization along the margins of the conceptual open pit used for the recent PEA update (after-tax NPV (5%) of \$493 million and an IRR of 30% over a 12-year mine life) to reduce the strip-ratio. Today's results also demonstrate continuity within the southwestern extent of the Marathon deposit, along the footwall contact where higher-grade gold mineralization is associated with a steeply dipping structure to the northeast.

Haywood Research: The Week in Review – Uncovered Companies

News from the Junior sector this week included the following for uncovered companies:

- **GT Gold Corp. (GTT-V, \$1.61):** Drilling results

Mining Flashes:

GT Gold Corp. (GTT-V, \$1.61 [Not Rated]) – Porphyry Cu-Au Mineralization Expanded at Saddle North

Mick Carew, mcarew@haywood.com; Emma Boggio, eboggio@haywood.com

GT Gold announced drilling results from its Saddle North target, located approximately 500 metres north of the Saddle South target on the Company's Tatogga property within the Golden Triangle in northwestern British Columbia. The recent release is comprised of two drill holes (TTD098 and 102); a total of seven holes have been released to date (including 98 and 102) and results of an additional 5 holes are pending. Holes 102 and 98 represent ~500 metre step-outs from previous drilling, with both successfully intersecting wide zones of porphyry copper-gold mineralization, and returning results showing copper and gold grades increasing with depth. Porphyry-style mineralization has now been intersected along a strike length of approximately 600 metres, and to a depth of approximately 900 vertical metres from surface.

Dissemination of Research

Research reports are disseminated through electronic medium. Clients may access historic reports on our website, or receive publications directly via internet email. Haywood strives to ensure all clients receive research in a timely manner and at the same time. It is against our policy for analysts to discuss or circulate their recommendations internally prior to public distribution. This policy applies equally to recommendation changes, target changes and/or forecast revisions.

Any Haywood employee with knowledge of the intended distribution of a research report that includes a new recommendation or a change in recommendation or target price, is restricted from trading securities of the issuer until such time as our clients have been provided the opportunity to receive, digest and potentially act on the information (generally one trading day). This temporary "pro" restriction does not prevent an Investment Advisor from offering recommendations to clients.

For Canadian residents: Haywood Securities Inc. is a Canadian registered broker-dealer and a member of the Investment Industry Regulatory Organization of Canada, the Toronto Stock Exchange, the Toronto Venture Exchange and the Canadian Investor Protection Fund and accepts responsibility for the dissemination of this report. Any Canadian client that wishes further information on any securities discussed in this report should contact an Investment Advisor of Haywood Securities Inc.

For U.S. residents: This investment research is distributed in the United States, as third party research by Haywood Securities (USA) Inc. Haywood Securities (USA) Inc. is a wholly-owned subsidiary of Haywood Securities Inc., registered with the U.S. Securities and Exchange Commission, and a member of FINRA and the Securities Investor Protection Corporation (SIPC). Haywood Securities (USA) Inc. as a U.S. registered broker-dealer accepts responsibility for this Research Report and its dissemination in the United States. Any U.S. client that wishes further information on any securities discussed in this report or to effect a transaction in these securities should contact a Registered Representative of Haywood Securities (USA) Inc. Haywood Securities Inc. Research Analysts are considered Foreign Research Analysts as relates Haywood USA and are not registered/qualified as Research Analysts with FINRA. As these analysts are considered Foreign Research Analysts they may not be specifically subject to FINRA Rule 2241 restrictions on communications with a Subject Company, Public Appearances or trading securities held by a Research Analyst Account.

This report may be distributed in the following states: nil. Otherwise, this report may only be distributed into those states with an institutional buyer state securities registration exemption.

Analyst Certification

We, Mick Carew, Geordie Mark, Colin Healey, Pierre Vaillancourt, and Kerry Smith, hereby certify that the views expressed in this report (which includes the rating assigned to the issuer's shares as well as the analytical substance and tone of the report) accurately reflect my/our personal views about the subject securities and the issuer. No part of my/our compensation was, is, or will be directly or indirectly related to the specific recommendations.

Rating Structure

Each company within an analyst’s universe, or group of companies covered, is assigned: (i) a recommendation or rating, usually BUY, HOLD, or SELL; (ii) a 12 month target price, which represents an analyst’s current assessment of a company’s potential stock price over the next year; (iii) an overall risk rating which represents an analyst’s assessment of the company’s overall investment risk; and (iv) specific risk ratings or risk profile parameters which in their aggregate support an analyst’s overall risk rating. These ratings are more fully explained below. Before acting on our recommendation we caution you to confer with your Haywood investment advisor to determine the suitability of our recommendation for your specific investment objectives, risk tolerance and investment time horizon.

Recommendation Rating

BUY –The analyst believes that the security will outperform other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) BUY rating.

HOLD – The analyst believes that the security is expected to perform in line with other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) HOLD rating.

SELL – Investors are advised to sell the security or hold alternative securities within the sector. Stocks in this category are expected to under-perform other companies on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) SELL rating.

TENDER – The analyst is recommending that investors tender to a specific offering for the company’s stock.

RESEARCH COMMENT – An analyst comment about an issuer event that does not include a rating or recommendation.

UNDER REVIEW – Placing a stock Under Review does not revise the current rating or recommendation of the analyst. A stock will be placed Under Review when the relevant company has a significant material event with further information pending or to be announced. An analyst will place a stock Under Review while he/she awaits sufficient information to re-evaluate the company’s financial situation.

COVERAGE DROPPED – Haywood Securities will no longer cover the issuer. Haywood will provide notice to clients whenever coverage of an issuer is discontinued.

Haywood’s focus is to search for undervalued companies which analysts believe may achieve attractive risk-adjusted returns. This research coverage on potentially undervalued companies may result in an outweighed percentage of companies rated as BUY. Management regularly reviews rating and targets in all sectors to ensure fairness and accuracy.

For further information on Haywood Securities’ research dissemination policies, please visit: <http://haywood.com/what-we-offer/research/research-policy>

Overall Risk Rating

Very High Risk: Venture type companies or more established micro, small, mid or large cap companies whose risk profile parameters and/or lack of liquidity warrant such a designation. These companies are only appropriate for investors who have a very high tolerance for risk and volatility and who are capable of incurring temporary or permanent loss of a very significant portion of their investment capital.

High Risk: Typically micro or small cap companies which have an above average investment risk relative to more established or mid to large cap companies. These companies will generally not form part of the broad senior stock market indices and often will have less liquidity than more established mid and large cap companies. These companies are only appropriate for investors

who have a high tolerance for risk and volatility and who are capable of incurring a temporary or permanent loss of a significant loss of their investment capital.

Medium-High Risk: Typically mid to large cap companies that have a medium to high investment risk. These companies will often form part of the broader senior stock market indices or sector specific indices. These companies are only appropriate for investors who have a medium to high tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital.

Moderate Risk: Large to very large cap companies with established earnings who have a track record of lower volatility when compared against the broad senior stock market indices. These companies are only appropriate for investors who have a medium tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital.
